APIs and data: REST API, Fetch API, JSON, async/await
Tools: Git, GitHub, GitHub Pages, Python, browser developer tools
IT support: Help desk, technical support, hardware troubleshooting, hardware installation, network cabling, Windows OS, field support

Professional Experience

Freelance Web Developer

Self-employed | Remote | Sep 2026 – Present

- Designed, developed and deployed a fully responsive live website for a patisserie shop based in Rotterdam, Netherlands (remote project, in active use).
- Managed client requirements, modern UI layout and production deployment.
- Built with HTML5, CSS3 and JavaScript and published on GitHub Pages.

IT Support / Help Desk Technician (Intern)

Teknofix | Maltepe, Istanbul, Türkiye | Sep 2024 – Jun 2025

- Provided IT support and help desk assistance, including on-site field support.
- Performed hardware installation and troubleshooting, network cabling and Windows OS support.

Projects

- **Weather App** – Web application that shows live weather by city using a weather REST API, Fetch API and async/await. Live demo: beytullahayar.github.io/weather-app | Code: github.com/beytullahayar/weather-app
- **Currency Converter** – Web application that converts currencies using live exchange rates from a REST API. Live demo: beytullahayar.github.io/currency-converter | Code: github.com/beytullahayar/currency-converter
- **Yeşilçam Pastanesi Website** – Responsive business website with a dark glass-style design, built for a real client. Live demo: yesssilcam.github.io/yesilcampatisserie-menu
